Alexandre TANGUY

Engineering manager

Head of IT technical teams and projects with a network and security engineer background.
What I (love to) do: management of teams, encouraging excellence, lead by example, being data-driven and customer-oriented.
What I am not: a software engineer.

▬▬▬ Who am I and what am I looking for?

After 8 years in the tech field as a network and security engineer, where I learned lots of things and grow up as an engineer and a human being, I understood that I was happier and better leading a team and helping its members to grow. I seized the opportuny offered by OVHcloud to manage one and then two teams of software engineers.
Today, I love this mission and I am eager to continue in a challenging environment with

▬▬▬ Professional experience

Engineering Manager @ OVHcloud *(January 2020 - Present)*
Team leader of the Network Data squad, composed of the Network Observability and the Network IPAM teams. 1. Monitoring tens of thousands of network devices: 50M+ timeseries / 1M+ datapoint per seconds / 25M+ log messages per day 2. Managing around 4.5M public IP addresses in 3 RIR (RIPE, ARIN, APNIC)

- Point of contact for other teams and PU, for Network observability and IP related topics
- Follow-up on projects
- Creation of roadmaps with Program managers support
- Agile methodology implementation and animation: sprint planning, daily, sprint review, retrospectives, etc.
